About

The Master's in Sustainability in Management is designed for students who want to manage and lead sustainability initiatives in the corporate environment. You will become university-educated professionals for positions such as Chief Sustainability Officer, CSR Manager and Sustainability Manager. Our students are offered work placements with the Faculty of Business Administration's corporate partners with a focus on sustainability issues.

Graduate's key competencies

- Analyzing key concepts, theories, and models that connect various global sustainability challenges to effective organizational management
- Assessing the environmental, social, and economic impacts of strategic business decisions
- Crafting innovative, economically feasible strategies that also yield environmental and social benefits
- Facilitating stakeholder engagement in international sustainability discussions
- Fostering an organizational culture rooted in respect, diversity, inclusion, and sustainability principles

Graduates are prepared for roles such as Sustainability Managers, Chief Sustainability Officers, ESG Analysts, Green Innovation Consultants, Green Investment Specialists, and CSR Specialists.

Key programme parameters

- 3 semesters, 100 ECTS
- A professionally oriented Master's program in Sustainability Management
- Completion requires a thesis defense and a final state examination
- Includes a mandatory 30 ECTS internship with professional academic supervision
- Instruction language: English
- Enrolment capacity: 25–30 students annually
